Thank you, Pam. 3-5 is the correct number of days of water supply remaining for Morningstar. I have corrected the number in the table and added a note below the table explaining the revised number. I will send out the revised sit rep.

The sitrep has some inconsistencies. In the Operations section you say that we are working with Morningstar because it only has 3 to 5 days of water left and in the table you show Morningstar has 10 days of water. Which is correct? If the 10 days is correct, we need to add some sentences that state that we worked out the problem and M now has a 10 day supply
